### WHAT I AM / WHAT YOUR STUDIO MAY NEED

**I am an interdisciplinary visual lead:** a CG supervisor, art director, animation director, and creative technologist who translates written briefs, narrative storyboards, abstract messages, rhythm, and brand intention into cinematic visual systems that can be produced at studio speed.

**The question is not only what title I fit into. The stronger question is what visual problem your studio needs solved:** story-to-image translation, premium CG execution, product visualization, pitch development, custom pipeline design, AI-assisted ideation, or supervision across art and technology.

| 17+ years                                                | 20+ campaigns                                                          | Teams Up to 10 artists                                                  | +7,200 NFTs                                   |
|----------------------------------------------------------|------------------------------------------------------------------------|-------------------------------------------------------------------------|-----------------------------------------------|
| Cinematic CGI, motion design, VFX, and visual direction. | Marumedia Tokyo commercial work including CASIO / G-SHOCK and CITIZEN. | Supervised project teams across CG, rendering, compositing, and motion. | Digital art editions sold Ethereum and Tezos. |

### BEST-FIT STUDIO PATHWAYS

| Pathway                           | How a studio can use me                                                                                                              | Possible titles                                                                            |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| Creative Leadership               | Interpret the message, rhythm, story, and art direction; create visual options for directors and clients.                            | Interdisciplinary Visual Lead, Art Director, Associate Creative Director, Motion Director  |
| CG / Production Supervision       | Define CG execution, supervise 3D artists, look development, rendering, compositing, quality control, and delivery.                  | CG Supervisor, Visualization Supervisor, Look Development Lead, Product Visualization Lead |
| Creative Technology / AI Workflow | Build project-specific pipelines that combine CG discipline, AI-assisted ideation, rapid visual exploration, and production control. | Creative Technologist, AI Workflow Lead, R&D Visual Artist, Pipeline Consultant            |

### SELECTED PROOF OF VALUE

- CG Supervisor across named commercial campaigns and product films, especially within Marumedia Tokyo projects for CASIO, G-SHOCK, CITIZEN, Mitsui OSK, Nippon Steel, UD Trucks, ISUZU, YAZAKI, and Lexus GT-related promotional work.
- Converted written briefs and text-based storyboards into cinematic visual direction, shot language, product staging, lighting logic, motion rhythm, and production-ready CG plans.
- Built and supervised project-specific workflows, balancing artistic quality with speed, technical precision, client options, and final delivery discipline.
- Expanding a research-art-technology bridge: my educational visual research is being used/adapted in New Zealand early childhood contexts, including new approaches that connect mathematics, art, spatial reasoning, and procedural play.

### FEATURED CAMPAIGNS AND SUPERVISION FOCUS

| Project                                          | Role and contribution                                                                                                                                                                                                       |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| G-SHOCK 40th Anniversary - U.S. event main video | CG Supervisor and main video creator. Translated the celebration brief into cinematic product storytelling; defined visual rhythm, shot flow, product emphasis, material/light direction, render quality, and final polish. |
| CITIZEN Series 8 Mechanical                      | CG Supervisor. Led luxury watch visualization logic, mechanical detail presentation, metal and glass look development, cinematic lighting, camera timing, and premium product storytelling.                                 |
| CASIO Classic CA-500                             | CG Supervisor. Turned retro-tech product identity into a clean visual narrative; developed product staging, macro detail emphasis, motion rhythm, lighting, and campaign-ready CG execution.                                |
| G-SHOCK GW-5000                                  | CG Supervisor. Built visual language around durability, weight, precision, structure, and premium material character; supervised product rendering, animation, compositing, and final visual consistency.                   |

PROFESSIONAL EXPERIENCE

Marumedia - Tokyo, Japan | CG Supervisor & Visual Effects Lead | 2023-Present

- Supervised 20+ commercial CGI, motion, and product visualization campaigns with teams ranging from 3 to 10 artists, depending on project scope.
- Led CG supervision across high-precision Japanese commercial work where technical accuracy, design discipline, visual polish, material fidelity, and timing are critical.
- Translated text briefs, director notes, and written storyboards into visual treatment, shot order, camera logic, product reveal, rhythm, and production execution.
- Managed look development, lighting, rendering, compositing, troubleshooting, client option generation, and final delivery across premium technology, industrial, and product campaigns.

**Selected projects:** G-SHOCK 40th Anniversary U.S. event main video; CITIZEN Series 8 Mechanical; CASIO Classic CA-500; G-SHOCK GW-5000; CASIO Edifice Carbon Edition; CASIO GA01; Mitsui OSK COP28; Nippon Steel Engineering DX; UD Trucks; YAZAKI; ISUZU; Nubia Flip Phone; KOWA.

|                                                                                                                                                                                                                                                                                                                                                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>D3Canvas Studio - Yerevan, Armenia   Founder / Director / Production Manager   2019-Present</b><br>Founded and lead a multidisciplinary CGI and animation studio. Direct art direction, client communication, team coordination, production supervision, rendering workflow design, commercial CGI, product visualization, and cinematic branding. |
| <b>Dreamfarm Studio   Render Supervisor / Art Director / Composite Supervisor   2018-2019</b><br>Managed rendering pipelines, compositing supervision, visual quality control, and art direction for commercial and broadcast production.                                                                                                             |
| <b>Health Channel Art Group   Animation Director &amp; Art Group Leader   2016-2020</b><br>Directed animation productions and supervised creative teams across television, broadcast, and motion graphics workflows.                                                                                                                                  |
| <b>Grid3D / PAG / Freelance International Production   2004-Present</b><br>Led and produced motion design, broadcast design, product visualization, VFX, promotional films, commercial animation, and international CGI projects across Asia, Europe, the Middle East, and North America.                                                             |

RESEARCH, ART, TECHNOLOGY AND AI

**Research-to-studio value:** My research practice strengthens my ability to analyze visual meaning, design systems of interpretation, and convert complex ideas into structured visual experiences. This is already extending into New Zealand educational contexts, where my methods are being used/adapted around mathematics, art, spatial memory, and procedural play.

**AI workflow value:** I use AI for concept exploration, ideation, visual options, styleframe development, and pitch acceleration, while maintaining authorship, CG supervision, and production control. I also have hands-on technical command of AI systems including ComfyUI and controlled image/video generation workflows.

CORE CAPABILITIES

|                        |                                                                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Visual Leadership      | Art direction; cinematic composition; rhythm; visual narrative; storyboard interpretation; client option design; message engineering.                                      |
| CG / VFX Production    | CG supervision; look development; lighting; shading; rendering; compositing; product animation; motion graphics; pipeline optimization.                                    |
| Software / Engines     | Cinema 4D; HoudiniFX; Maya; Unreal Engine; NukeX; After Effects; Premiere Pro; Redshift; Octane; Arnold; V-Ray; Substance 3D Painter; ZBrush; Three.js.                    |
| Recognition            | 7,200+ NFT editions sold; international film festival selections; Arts in Society presenter; ARETL international conference presenter.                                     |
| Education / Background | Advanced Diploma in Professional Animation Direction & Supervision; traditional drawing and oil painting; professional photography; music performance and rhythm literacy. |

STRATEGIC CLOSING

I am not looking to fit into one narrow production box. I am looking to help a studio solve the visual problems that sit between idea, story, design, CG execution, client communication, and emerging technology. Give me a brief, a storyboard, or an unresolved visual challenge, and I can help turn it into structured visual options and a production-ready path.
